

Standard Features

- Viewing area of 90mm x 70mm
- 16 x motorised zoom lens
- Very fast CCD camera technology from a world leading manufacturer, ensuring excellent picture quality and reliability
- Built-in Xenon strobe assembly
- High performance 15" super VGA monitor giving a crisp, flicker-free display of the web
- Small but powerful system will fit all presses and is particularly suited where space is at a premium.
- Camera case measures 9.5" x 5.5" x 4.5"
- Simple colour coded "one key - one function" system makes operation of the unit easy
- CE mark conforms to all relevant EU requirements for quality and reliability
- Synchronisation to press may be achieved from a variety of sources (gears, encased wheels, machine signals, etc)
- Virtually indestructible operating system
Simple to install, clean and service
- Fits any press

K1 - The first of a new range of video web inspection systems for printers who require easy to use, high quality print inspection at a low cost.

K1 - May be used in friendly or hostile environments on webs of any width, K1 will do exactly what is expected and help you improve your print quality.

K1 - Is small, smart and very clever.

Dynaspede offers world class 'Tectonic' video web inspection systems in India and provides excellent local application engineering and post sales support in India and neighbouring countries.

Tectonic International, UK, is a leading supplier of print inspection systems for the printing and conversion industry and have experience of over two decades in this field.

The Tectonic range of systems packed with interesting standard and optional features greatly help modern day presses to keep up to stringent print quality with consistency, reduce wastage, optimise machine utilisation and increase productivity.

The range of web inspection systems encompasses simple yet powerful 'K1' systems through versatile and advanced 'Lynx' web inspection systems to top-of-the-line 'Sabre' systems for 100% inspection.
